Input by Harunaga Isaacson

Corrected GRETIL version based on the adaptation by Jan Brzezinski (available from Gaudiya Grantha Mandira); in addition, parts left out in the course of that adaptation were restored, and the reference system was revised.

Harunaga Isaacson's original e-text has been subjected to a large number of tacit changes in the Gaudiya Grantha Mandira version, apart from the missing verses. E.g., many b's have been changed to v's. In some cases the divergence may be on account of a different text.

Quite a number of these changes led to metrical corruptions, and have been revised

in the present version. Nonetheless, it remains a hybrid between H. Isaacson's text and other readings.
