

Consequently, many word boundaries are not marked by spaces.

The Nagari e-text follows the layout and graphic appearance of the printed edition very closely. It sometimes even adds blanks when a line break cuts through a word or compound.

These and other irregularities cannot be standardized at present.

After more than 1,500 corrections, the text still needs further proof-reading!

Mistakes may stem from the Devanagari version, or in a few cases they may have occurred during conversion. In case of doubt, they may be checked against the online Devanagari files available from the SANSKNET server.

Please report possible conversion errors.

This will help improve the routine for future tasks.

Revisions:
